BENEFITS

Sensor Dry

Senses the residual moisture in the clothes and automatically stops when the desired dryness is achieved. This protects your clothes by ensuring they aren't over dried and saves energy by using the exact amount of energy required for any load size

Auto Reversing

Tumble action alternates clockwise to anti-clockwise. Reduces clothes tangling and bunching together, so they dry more evenly and quickly

Crease-free

Periodically rotates the drum after the drying cycle has finished. Prevents clothes from settling, which reduces the need for ironing

Flexible venting options

You choose whether to front or rear vent, with or without the optional venting kit. Allows you to choose the best option to suit your laundry needs
